Homelessness is a concern for individuals and communities across the state. This webinar will reveal findings from a Sociological Initiatives study and provides insights from scholars and people with lived experience, along with policy recommendations to improve the wellbeing of all New Hampshire residents.

This project is supported by Salem State University’s Center for Childhood & Youth Studies, the Initiative for Civility in Everyday Life, The World As It Could Be, the Vermont Law and Graduate School, and the Youth Success Project, and Public Engagement Partners.
